Notebook, N-87-06-00

This notebook covers the period June-October 1887. It was used primarily by Charles Batchelor. There are also scattered entries by Edison and an unidentified employee. The book contains notes regarding orders for machinery and other equipment to outfit the West Orange laboratory. There are also a few notes and drawings pertaining to the layout of the laboratory. The front cover is marked "499." The book contains 217 numbered pages. Several pages were removed before pagination.

Blank pages not filmed: 92-93, 96-101, 150-211.

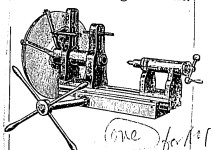
GEAR CUTTING ATTACHMENT

TO THE

No. 1

Universal Milling Machine.



This device is designed to accelerate the cutting of gear wheels, and also for cutting larger and heavier wheels than can be cut with the ordinary apparatus belonging to the Uni. al Milling Machine. It swings 14 inches, and is furnished with a 20 in. index containing 4701 holes. It will divide all numbers to 75, and all even numbers to 150. Arbors fitted to the Universal Milling Machine can be used in this device. The screw with set nuts over the spindle is designed as a support for the wheel while being cut. Weight, boxed, 400 lbs. Price,

The head and foot stock of the above attachment can be fitted for use upon the No. 3 Universal Milling Machine. Price,
